

Harmony Group - Integration Developer

What do you do as an Integration Developer?

As an integration developer you will delve into the integration issues of our customers. Do you like complex challenges as a developer and do not want to be limited to one system or programming language, then this might be the perfect job for you....

- In this challenging position, you will have the opportunity to support clients in implementing their integration strategy by developing software within the integration platform MuleSoft (part of Salesforce).
- You will configure connectors and build API's based on architectural principles and technical designs.
- To do this, you will work in AnyPoint Studio (a derivative of Eclipse) and apply the Harmony and MuleSoft coding guidelines.
- You play an active role in bug & incident analysis and provide technical solutions to the problems.
- You will be deployed on large projects at our customers in very diverse industries: healthcare, telecom, logistics, supply chain, chemical, manufacturing, banking, etc.
- Within Agile development teams you will devise the solutions for the necessary integrations for the (business) customer.
- You will contribute to the growth of Harmony by sharing your knowledge with your colleagues and supporting them in their growth and vice versa.
- You will work closely with our own nearshore team in Bosnia.

What does Harmony have to offer?

- A pleasant, informal working environment with a flat structure, short lines of communication, a professional way of working and a lot of trust.
- Interesting projects at large, leading companies mainly in the Netherlands and Belgium.
- Many opportunities and possibilities for growth: we listen to your wishes and ambitions and help you achieve them through personal coaching.

- Opportunity to continuously train and improve yourself, both in hard and soft skills.
- A good work-life balance & attention to well-being. We try to organize as much teleworking as possible in our clients' projects.
- An attractive salary package with a lease car (or mobility budget), smartphone, laptop, extra leave days, flexible working hours, flexible income plan, hospitalization insurance and ambulatory expenses insurance, pension savings and life insurance.

Are you the person we are looking for?

- You have a bachelor's or master's degree in IT and have about 2 years of experience developing backend software.
- In case you have already worked with integration software (MuleSoft, Dell Boomi, TIBCO, SnapLogic, Informatica) or if you have extensive experience in programming (in C# or Java), you will easily catch up.
- If you have extensive experience in programming (in C# or Java) or integration software (MuleSoft, Dell Boomi, TIBCO, SnapLogic, Informatica), you will be able to get started very quickly.
- You are enthusiastic, proactive and flexible. You are a real team player.
- You can solve problems and make connections quickly
- You can design and develop web services and APIs.
- You have basic knowledge of SQL.
- You have experience with 1 or more source control systems.
- You are familiar with the principles of Continuous Integration and Deployment.
- You work fluently with scrum and agile methodologies.
- You are driven to stay up-to-date with new developments in the market.
- You speak and write English fluently. Speaking Dutch and/or French is an advantage.
