

Harmony Group – Management Consultant

What does a management consultant do at Harmony?

As a management consultant you will be part of an enthusiastic & dynamic team.

- You will work on different digital transformation projects for our customers that are mainly situated in the banking, insurance or healthcare sector.
- On these digital projects we want to help our customers realize their ideas, e.g. development of a mobile app or platform, the implementation of artificial intelligence and/or process optimization and digitalization.
- This means that, together with the client, we draw up concepts, map out customer journeys, identify/document business requirements and help guide the development team.
- We act as a facilitator who can be deployed in the project from A to Z, from ideation to testing.

You will also contribute to the growth and improvement of Harmony by:

- Contributing to the development of new Harmony products or services.
- Being part of one of the expertise centers (people, delivering expertise, business development or ...).
- Letting your entrepreneurship and creativity come to the surface.
- Build strong customer relationships and act as an Harmony ambassador in the market.
- Help organize internal and external events and activities.

What does Harmony have to offer?

- You will be part of an enthusiastic & dynamic team where you will have the opportunity to take initiative and create impact.
- A flat structure, short communication lines and an informal, friendly team and result-oriented culture in which everyone is proud of their work.
- Many opportunities and possibilities to grow: you get the chance to shape your own personal development path and are guided in this by personal coaching and training.
- A good work-life balance and attention to well-being.
- An attractive salary package with a company car and a package of interesting extra-legal benefits that you can put together yourself according to your personal needs.
- You hold a Master's degree and have at least 2 years of experience in management consulting, preferably in the field of process optimization, innovation or digital transformation.
- Project management and business modeling methodologies are your pet subjects.
- You have a strong 'customer centered mindset'.
- Your friends and colleagues describe you as a team player who easily takes initiative and who is good at listening and capturing what others need.

- If you already have experience in the banking or insurance sector, this is definitely an asset, but not a must.
- Project driven work is just what you need because of the variety and the challenge.
- You are fluent in Dutch, English and French.

Are you the person we are looking for?

- You hold a Master's degree and have at least 2 years of experience in management consulting, preferably in the field of process optimization, innovation or digital transformation.
- Project management and business modeling methodologies are your pet subjects.
- You have a strong 'customer centered mindset'.
- Your friends and colleagues describe you as a team player who easily takes initiative and who is good at listening and capturing what others need.
- If you already have experience in the banking or insurance sector, this is definitely an asset, but not a must.
- Project driven work is just what you need because of the variety and the challenge.
- You are fluent in Dutch, English and French.
